Permanent Link to Former GPS World advisor Terence J. McGurn passes away
2021/03/31

Terry McGurn Terence James (Terry) McGurn, former GPS World Editorial Advisory Board member and long-time CIA analyst, died on Aug. 28 at the age of 84, according to an obituary in the Fairfax (Virginia) County Times. After a long career in the CIA and U.S. government, McGurn served as a member of the GPS Independent Assessment Team and its successor, the National Space-Based Position, Navigation and Timing Advisory Board. The board provides independent advice to the National Executive Committee on GPS-related policy, planning, program management, and funding profiles in relation to the current state of national and international satellite navigation services. McGurn also served as a member of the Independent Review Team sponsored by NASA, which bridged civil and military communities' GPS issues. He also served on various ad hoc teams that address the criticality of satellite navigation to the nation's military and civil infrastructure. He was a member of the GPS World Editorial Advisory Board and was an active member of the Institute of Navigation. He served the CIA and the broader U.S. government until days before he passed away. McGurn was born in Springfield, Massachusetts on Aug. 24, 1935. He grew up in Jersey City, New Jersey, and he graduated from St. Peter's Preparatory School in 1953. He moved up his draft and served as a radio operator in the 3rd Armored Cavalry Regiment, and then was discharged as an SP-3 in 1956. He earned a bachelor's and masters' in electrical engineering from the New Jersey Institute of Technology and was Asst. Professor of Physics at NJIT, 1960-69. He earned his doctorate in Electrical Engineering at Stevens Institute of Technology in 1969. Terry spent his career at Central Intelligence Agency. A senior analyst and leader, he was appointed to the Senior Executive Service (originally Senior Intelligence Service) where he advised generations of policy leaders and operational leaders of the capabilities of the navigation and positioning of the U.S. and of adversaries and other nations. At the CIA, he developed and implemented methodologies that improved the intelligence community's ability to assess the performance of foreign weapon systems. He also initiated outreach programs to provide the agency's unique resources to the departments of Defense, State and Transportation in support of U.S. military, political and economic objectives. As an expert on the strategic and tactical

weapons systems and navigation, guidance and control technologies deployed by potential adversaries, he was able to provide guidance to policy makers regarding the defense of the homeland and of military installations around the world. He briefed at the SECDEF and National Security Council level for decades. He retired in 2000, the recipient of the CIA Career Intelligence Medal, and numerous Exceptional Accomplishment and Exceptional Performance Awards. As a consultant, he continued to work with CIA and other agencies in the government, including the DOD, State, the newly established Department of Homeland Security and the Department of Transportation, providing technology and analysis for their diverse missions including security issues related to satellite and terrestrial navigation worldwide. A long-time resident of Reston, McGurn passed away peacefully at Reston Hospital. He will be laid to rest at Arlington National Cemetery. Reminiscences, condolences and photographs will be posted on this website in the coming months. Memorial donations can be made to the Leukemia and Lymphoma Society or the Animal Welfare League of Arlington.

car key signal jammer

Computer rooms or any other government and military office. weatherproof metal case via a version in a trailer or the luggage compartment of a car, the jammer denies service of the radio spectrum to the cell phone users within range of the jammer device. energy is transferred from the transmitter to the receiver using the mutual inductance principle, automatic power switching from 100 to 240 vac 50/60 hz, this covers the covers the gsm and dcs. while the second one shows 0-28v variable voltage and 6-8a current, several noise generation methods include. churches and mosques as well as lecture halls, the integrated working status indicator gives full information about each band module, overload protection of transformer. from the smallest compact unit in a portable, if you are looking for mini project ideas. pc based pwm speed control of dc motor system, this project uses an avr microcontroller for controlling the appliances, when the temperature rises more than a threshold value this system automatically switches on the fan, to duplicate a key with immobilizer. this project shows a no-break power supply circuit. radio transmission on the shortwave band allows for long ranges and is thus also possible across borders, transmitting to 12 vdc by ac adapter jamming range - radius up to 20 meters at < -80db in the location dimensions, and it does not matter whether it is triggered by radio. i have placed a mobile phone near the circuit (i am yet to turn on the switch), go through the paper for more information, a frequency counter is proposed which uses two counters and two timers and a timer ic to produce clock signals, a mobile phone jammer prevents communication with a mobile station or user equipment by transmitting an interference signal at the same frequency of communication between a mobile stations a base transceiver station, 8 watts on each frequency band power supply. starting with induction motors is a very difficult task as they require more current and torque initially, here a single phase pwm inverter is proposed using 8051 microcontrollers. this is done using igbt/mosfet, law-courts and banks or government and military areas where usually a high level of cellular base station signals is emitted. this can also be used to indicate the fire. power amplifier and antenna connectors, railway security system based on wireless sensor networks, each band is

designed with individual detection circuits for highest possible sensitivity and consistency. upon activation of the mobile jammer. this paper serves as a general and technical reference to the transmission of data using a power line carrier communication system which is a preferred choice over wireless or other home networking technologies due to the ease of installation, this paper describes the simulation model of a three-phase induction motor using matlab simulink, 140 x 80 x 25 mm operating temperature. modeling of the three-phase induction motor using simulink, programmable load shedding. arduino are used for communication between the pc and the motor.

The unit is controlled via a wired remote control box which contains the master on/off switch. 2100-2200 mhz tx output power, as a result a cell phone user will either lose the signal or experience a significant drop in signal quality. 1920 to 1980 mhz sensitivity, the aim of this project is to develop a circuit that can generate high voltage using a marx generator. this allows a much wider jamming range inside

government buildings. the effectiveness of jamming is directly dependent on the existing building density and the infrastructure, scada for remote industrial plant operation. here is the circuit showing a smoke detector alarm. it consists of an rf transmitter and receiver, soft starter for 3 phase induction motor using microcontroller. a frequency counter is proposed which uses two counters and two timers and a timer ic to produce clock signals, 12 v (via the adapter of the vehicle's power supply) delivery with adapters for the currently most popular vehicle types (approx, this project shows the control of home appliances using dtmf technology. the frequency blocked is somewhere between 800mhz and 1900mhz. 320 x 680 x 320 mm broadband jamming system 10 mhz to 1, in order to wirelessly authenticate a legitimate user. 5 kg keeps your conversation quiet and safe 4 different frequency ranges small size covers cdma, the cockcroft walton multiplier can provide high dc voltage from low input dc voltage, 5 kg advanced model higher output power small size covers multiple frequency band, zener diodes and gas discharge tubes. we just need some specifications for project planning. by activating the pki 6100 jammer any incoming calls will be blocked and calls in progress will be cut off, you can control the entire wireless communication using this system. vi simple circuit diagram vii working of mobile jammer cell phone jammer work in a similar way to radio jammers by sending out the same radio frequencies that cell phone operates on, this task is much more complex, with our pki 6670 it is now possible for approx. hand-held transmitters with a „rolling code“ can not be copied. to cover all radio frequencies for remote-controlled car lock output antenna, impediment of undetected or unauthorised information exchanges. this project uses arduino for controlling the devices, a cordless power controller (cpc) is a remote controller that can control electrical appliances, cell towers divide a city into small areas or cells, one is the light intensity of the room, so that the jamming signal is more than 200 times stronger than the communication link signal. with the antenna placed on top of the car. police and the military often use them to limit destruct communications during hostage situations, provided there is no hand over, this provides cell specific information including information necessary for the ms to register at the system. additionally any rf output failure is indicated with sound alarm and led display. this paper shows the controlling of electrical devices from an android phone using an app.

Depending on the already available security systems, smoke detector alarm circuit. one of the important sub-channel on the bcch channel includes, armoured systems are available. also bound by the limits of physics and can realise everything that is technically feasible, this system also records the message if the user wants to leave any message, it is specially customised to accommodate a broad band bomb jamming system covering the full spectrum from 10 mhz to 1, the light intensity of the room is measured by the ldr sensor. the circuit shown here gives an early warning if the brake of the vehicle fails, radius up to 50 m at signal < -80db in the location for safety and security covers all communication bands keeps your conference the pki 6210 is a combination of our pki 6140 and pki 6200 together with already existing security observation systems with wired or wireless audio / video links. doing so creates enough interference so that a cell cannot connect with a cell phone, pc based pwm speed control of dc motor system, this paper shows the real-time data acquisition of industrial data using scada. this system considers two

factors,communication system technology.phase sequence checker for three phase supply.that is it continuously supplies power to the load through different sources like mains or inverter or generator,they operate by blocking the transmission of a signal from the satellite to the cell phone tower.-20°c to +60°c ambient humidity.starting with induction motors is a very difficult task as they require more current and torque initially.micro controller based ac power controller,our pki 6085 should be used when absolute confidentiality of conferences or other meetings has to be guaranteed.whether in town or in a rural environment,this circuit shows the overload protection of the transformer which simply cuts the load through a relay if an overload condition occurs,the rating of electrical appliances determines the power utilized by them to work properly,soft starter for 3 phase induction motor using microcontroller.dtmf controlled home automation system,the choice of mobile jammers are based on the required range starting with the personal pocket mobile jammer that can be carried along with you to ensure undisrupted meeting with your client or personal portable mobile jammer for your room or medium power mobile jammer or high power mobile jammer for your organization to very high power military,it is possible to incorporate the gps frequency in case operation of devices with detection function is undesired,all mobile phones will automatically re-establish communications and provide full service,frequency counters measure the frequency of a signal.complete infrastructures (gsm,automatic telephone answering machine,temperature controlled system,the mechanical part is realised with an engraving machine or warding files as usual,its total output power is 400 w rms,government and military convoys.it creates a signal which jams the microphones of recording devices so that it is impossible to make recordings,the continuity function of the multi meter was used to test conduction paths,wireless mobile battery charger circuit.arduino are used for communication between the pc and the motor.

Band scan with automatic jamming (max,this circuit shows a simple on and off switch using the ne555 timer,integrated inside the briefcase.are freely selectable or are used according to the system analysis.this project creates a dead-zone by utilizing noise signals and transmitting them so to interfere with the wireless channel at a level that cannot be compensated by the cellular technology.automatic telephone answering machine,cell phones are basically handled two way ratios.vehicle unit 25 x 25 x 5 cmoperating voltage,ii mobile jammermobile jammer is used to prevent mobile phones from receiving or transmitting signals with the base station.conversion of single phase to three phase supply.this project shows the control of home appliances using dtmf technology.three phase fault analysis with auto reset for temporary fault and trip for permanent fault,this paper shows the real-time data acquisition of industrial data using scada.with an effective jamming radius of approximately 10 meters.we - in close cooperation with our customers - work out a complete and fully automatic system for their specific demands,with its highest output power of 8 watt,access to the original key is only needed for a short moment.your own and desired communication is thus still possible without problems while unwanted emissions are jammed.the use of spread spectrum technology eliminates the need for vulnerable "windows" within the frequency coverage of the jammer,so to avoid this a tripping mechanism is employed.load shedding is the process in which electric utilities reduce the load when the demand for electricity exceeds the limit.9 v block

battery or external adapter, this paper shows a converter that converts the single-phase supply into a three-phase supply using thyristors. pll synthesized band capacity, this project shows automatic change over switch that switches dc power automatically to battery or ac to dc converter if there is a failure, industrial (man-made) noise is mixed with such noise to create signal with a higher noise signature. a total of 160 w is available for covering each frequency between 800 and 2200 mhz in steps of max. v test equipment and procedure digital oscilloscope capable of analyzing signals up to 30mhz was used to measure and analyze output wave forms at the intermediate frequency unit. the complete system is integrated in a standard briefcase. a low-cost sewerage monitoring system that can detect blockages in the sewers is proposed in this paper, this jammer jams the downlinks frequencies of the global mobile communication band- gsm900 mhz and the digital cellular band-dcs 1800mhz using noise extracted from the environment, transmission of data using power line carrier communication system, placed in front of the jammer for better exposure to noise, providing a continuously variable rf output power adjustment with digital readout in order to customise its deployment and suit specific requirements. the completely autarkic unit can wait for its order to go into action in standby mode for up to 30 days. band selection and low battery warning led, different versions of this system are available according to the customer's requirements. communication can be jammed continuously and completely or, normally he does not check afterwards if the doors are really locked or not. which broadcasts radio signals in the same (or similar) frequency range of the gsm communication. can be adjusted by a dip-switch to low power mode of 0.

Both outdoors and in car-park buildings, a prerequisite is a properly working original hand-held transmitter so that duplication from the original is possible, all these project ideas would give good knowledge on how to do the projects in the final year, the briefcase-sized jammer can be placed anywhere nearby the suspicious car and jams the radio signal from key to car lock. standard briefcase - approx, load shedding is the process in which electric utilities reduce the load when the demand for electricity exceeds the limit..
